

# FSU Pre-College Update

Volume 5, Issue 1

October 27, 2009

## PERSIST COLLEGE ROAD TRIP

In conjunction with Elizabeth City State University, FSU went on a college tour of NC A&T State University on July 10, 2009 and concluded with the PERSIST Banquet on Saturday, July 11, 2009.

The students met and conversed with faculty and perspective master and doctoral candidate students. They were also treated to a walking tour of the campus.

At the PERSIST Banquet, students received academic recognition awards for their participation in the PERSIST program.

## Pre-College Program: July 13-17, 2009

The 2009 Summer Scholars Program was held July 13-16, 2009 at Ramsey Street School. The summer program consisted of intense education and training for all members of the PCP and PERSIST participants.

The sessions provided an integrated and systematic approach combining math, science, and communications. The major objective of the program was to stimulate interest in math/science careers and motivation to continuously seek and pursue more experience in these fields.

During this session, the students had fun in the area of forensic science which is usually not available in a regular classroom atmosphere. Students were introduced to science areas pertaining to the theme. They identified the three (3) major types of fingerprints and then had to identify their own type of fingerprints. They also were introduced to blood typing. Using artificial blood, they then were to solve a mystery by the blood type. The students were instructed by the teachers on how to determine these things using science, math, and reasonable deduction.
