

## **GUIDELINES FOR MODULES**

Please use the module format for your proposal. The proposal does not have to be a complete module. It simply outlines the module. Proposals should include the following sections.

1. Course number and short description of course.
2. Description of module.
3. Objectives (what skills and knowledge students will gain from module).
4. Methodology (lectures / discussion / class projects / audio visual / blogs, etc.).
5. Evaluation - What percentage of the final course grade will come from this module?
6. Resources - It is not required that you fill this in at this time, as the UNC library specialists can help with this. However, you can list any resources you already know you will use.

## **APPLICATION**

Please submit a 1-2 page outline proposing what you plan to do in you module using the provided proposal cover sheet.
