Water Resource Management Module

Questions on “The Changing Water Paradigm” by Peter Gleick

1. What are the drivers for water resource development?
2. What are the goals for water resource development?
3. How does the prioritization of these goals vary between developed and developing countries?
4. Gleick makes the case that there is (or should be) a new 21st century paradigm of Water Resource Development. What are some of its elements?
5. How does he propose that we achieve this vision?
