

ECON 310

Assignment #3

Homework Quiz: Wednesday, March 25

1. Chapter 7, Numerical Exercises N1, N2

2. Widgets are provided by a competitive constant-cost industry where each firm has fixed costs of \$30. The following chart shows the industry-wide demand curve and the marginal cost curve of a typical firm.

Industry Wide Demand		Firm's Marginal Cost Curve	
Price	Quantity	q	MC
\$5	1500	1	\$5
10	1200	2	10
15	900	3	15
20	600	4	20
25	300	5	25
30	200	6	30
35	140	7	35
40	50	8	40

- Assume the industry is at its long-run competitive equilibrium. What is the price of a widget?
- How many firms are in the industry?

Suppose there is a SALES tax of \$15 per widget.

- In the short run, what is the new price of widgets?
- In the short run, how many firms leave the industry?
- In the long-run what is the new price of widgets?
- In the long-run, how many firms leave the industry?

3. The marginal revenue curve of a competitive firm is

- U-shaped.
- a ray from the origin.
- a horizontal line at the market price.
- downward sloping.

4. A firm will shut down in the short run if its revenues fail to cover its

- fixed costs.
- variable costs.
- total costs.
- sunk costs.

5. A competitive firm will exit an industry in the long run when the market price falls below its

- marginal revenue.
- marginal cost.
- average cost.
- average variable cost.

6. Suppose all firms in an industry are identical. In the long run, entry and exit guarantee that all firms will have zero

- marginal cost.
- average cost.
- economic profit.
- accounting profit.

Sales Tax

The following questions refer to the accompanying diagram which shows the effects of a sales tax imposed on consumers. The initial price and quantity are P_0 and Q_0 , respectively. After the tax is imposed, the equilibrium quantity is Q_1 , firms receive the price P_s , and consumers pay the price P_d .

7. Refer to Sales Tax. After the tax is imposed, consumers' surplus is equal to _____.

8. Refer to Sales Tax. Area $C + D + F + G$

- the total value that consumers receive from their purchases.
- the tax revenue collected by the government.
- the fall in producers' surplus.
- the deadweight loss due to the tax.

9. Refer to Sales Tax. After the tax is imposed, social gain is equal to _____.

10. Refer to Sales Tax. After the tax is imposed, the deadweight loss is equal to _____.

11. Prior to the sales tax, which of the following was false?

- Consumer surplus was $A+B+C+D+E$.
- Producer surplus was $F+G+H+I+J$.
- Government tax revenue was zero.
- Dead-weight loss was zero.

12. The diagram below shows Shontel's annual demand for videos. Shontel currently rents videos from Blockpopper's, which charges \$2.50 per rental.

- How many videos does Shontel rent each year? How much consumer's surplus does Shontel receive from renting videos?
- Blockpopper's starts a "frequent viewers" club. For a membership fee of \$35 per year, club members can rent as many videos as they wish at the discounted price of \$2 per rental. Should Shontel join the "frequent viewers" club? If yes, how much surplus value would Shontel receive as a club member? If no, what membership fee would Shontel be willing to pay to join the club?
