2006 Chapel Hill Expert Survey

Funded by the University of North Carolina at Chapel Hill
European Union Center for Excellence

October 2008

This dataset provides the data for the 2006 Chapel Hill Expert Survey on the positioning of 227 political parties on European integration in all EU member states (24) apart from Luxembourg, Cyprus, and Malta. The survey was administered in the summer of 2007 to 528 academics specializing in political parties and European integration in one of the countries considered. Two-hundred-thirty-five surveys were completed, a 45 percent response rate.

The Chapel Hill expert survey was conducted by Ryan Bakker, Anna Brigeovich, Catherine de Vries, Erica Edwards, Liesbet Hooghe, Gary Marks, Jan Rovny, Marco Steenbergen, and Milada Vachudova. Please contact hooghe@unc.edu or edwards@ihs.ac.at for information on the reliability and validity of the survey.*

The *2006_ChapelHillSurvey_means.sav* SPSS file contains average expert judgments per political party. The dataset contains an array of party- and country-specific variables such as vote percentage, party family, and government or opposition status.

Users interested in data at the individual expert level should consult the *2006_ChapelHillSurvey_rawdata.sav* SPSS file, which has information at the level of the individual expert and which has a separate codebook. This alternative dataset allows researchers to aggregate expert scores, estimate standard deviations among expert judgments, and calculate uncertainty estimates. The survey questionnaire specifies the full question format.

*In papers or publications that utilize this dataset, users are asked to refer to the dataset as the *2006 Chapel Hill expert survey* and cite documentation as follows (this citation will be replaced by the article of record for the data set when information is available):

VOTE = vote percentage received by the party in the national election most prior to 2007. When vote information is not available for separate coalition partners, vote percentage is calculated on the basis of the proportion of seats in parliament held by the coalition partner.

VOTE1 = vote percentage received by the party or the coalition in the national election most prior to 2007. When vote information is not available for separate coalition partners, vote percentage is based on the overall coalition vote.

FAMILY = classification is primarily based on Hix and Lord (1997), except that confessional and agrarian parties are placed in separate categories. Family association for parties in Central/Eastern Europe is based primarily on Derksen classification (now incorporated in Wikipedia), triangulated by a) membership or affiliation with international and EU party associations, and b) self-identification.
