

TABLE OF CONTENTS

	<u>Page</u>
ACKNOWLEDGEMENTS.....	
ABSTRACT	
Chapter	
1. INTRODUCTION.....	1
2. PHONOLOGICAL PRELIMINARIES	11
2.1. Introduction.....	11
2.2. Inventory and phonotactics in Optimality Theory	11
2.3. Inventory and phonotactics of English syllable onsets.....	14
2.3.1. Explicanda.....	15
2.3.2. Analysis.....	18
2.3.2.1. Representations	18
2.3.2.1.1. Consonant features	21
2.3.2.1.2. Features of [ɪ w ɪ].....	24
2.3.2.2. CV syllables.....	28
2.3.2.3.1. Undominated faithfulness constraints.....	30
2.3.2.3.2. Coronal stop places: Dental, retroflex, alveolar, and palato- alveolar.....	30
2.3.2.3.3. The persistence of [θ]	33
2.3.2.3.4. Dorsal places of articulation: Palatals and velars.....	35
2.3.2.3.5. Labial places of articulation: Bilabials and labiodentals	36
2.3.2.3.6. The stop-affricate-fricative series.....	37
2.3.2.3.7. Constraint lattice.....	41
2.3.2.3. * [sɪ]	42
2.3.2.4. * [tɪ]	46
2.3.2.5. ?? [pw]	48
2.4. Summary.....	51
3. THEORIES OF PHONOTACTIC EFFECTS IN SPEECH PERCEPTION.....	52
3.1. Introduction.....	52

3.2. TRACE (McClelland & Elman 1986)	52
3.2.1. How TRACE works	52
3.2.2. Lexical effects on phoneme perception.....	54
3.2.3. Phonotactic effects on phoneme perception	57
3.2.4. Empirical shortcomings	58
3.3. The MERGE Transitional Probability theory (Pitt & McQueen 1998).....	59
3.3.1. Simulation: Success of statistical predictions.....	61
3.3.2. Probabilistic theories of speech perception	64
3.3.2.1. Context.....	64
3.3.2.2. Database.....	67
3.3.2.3. Decision rule	70
3.3.3. Statistical context effects on phoneme perception.....	75
3.4. A grammar-based account	87
3.4.1. Choice of grammatical theory	88
3.4.1.1. Grammatical framework.....	88
3.4.1.2. Particular grammar.....	90
3.4.2. Decision mechanism	91
3.5. Summary	98
3.6. Appendix: Computing frequencies.....	100
4. EMPIRICAL TESTS.....	106
4.1. Introduction.....	106
4.2. Experiment 1: Sequence frequency and the phonotactics of word-final lax vowels.....	107
4.2.1. Rationale.....	107
4.2.2. Design	111
4.2.3. Predictions	117
4.2.3.1. TRACE simulation.....	117
4.2.3.1.1. Calibration and replication of the original TRACE results ...	117
4.2.3.1.2. Simulation of the present experiment.....	121
4.2.3.2. MERGE TP.....	130

4.2.3.2.1. INC-1	131
4.2.3.2.2. SC-1	134
4.2.3.3. OT grammatical theory.....	135
4.2.4. Methods.....	136
4.2.5. Results.....	139
4.2.6. Discussion	143
4.3. Experiment 2: Sequence frequency and word-initial [pw] clusters.....	143
4.3.1. Rationale.....	143
4.3.2. Design	144
4.3.3. Predictions	147
4.2.3.1. TRACE simulation.....	147
4.2.3.2. MERGE TP.....	150
4.2.3.2.1. INC-1	150
4.2.3.2.2. SC-1	153
4.2.3.3. OT grammatical theory.....	154
4.3.4. Methods.....	155
4.3.5. Results	157
4.3.6. Discussion	158
4.4. Experiment 3: Sequence frequency and the relative phonotactic badness of [pw] and [tl] onsets	159
4.4.1. Rationale.....	159
4.4.2. Design	160
4.4.3. Predictions	164
4.4.4.1. TRACE simulation.....	164
4.4.3.1.1. [_fkous] stimuli	165
4.4.3.1.2. [_vnΛm] stimuli.....	169
4.4.3.1.3. Expected and actual TRACE predictions	171
4.4.4.2. MERGE TP.....	172
4.2.3.2.1. INC-1	172
4.4.3.2.2. SC-1	176

4.4.3.3. OT grammatical theory.....	178
4.4.4. Methods.....	178
4.4.5. Results.....	179
4.4.5.1. [_vnΛm] stimuli	180
4.4.5.2. [_fkous] stimuli.....	184
4.4.6. Discussion	188
4.5. Experiment 4: Sequence frequency and the relative phonotactic badness of [bw] and [dl] onsets: Interaction of response variables.....	189
4.5.1. Rationale.....	189
4.5.2. Design	190
4.5.3. Predictions	191
4.2.3.1. TRACE simulation.....	191
4.2.3.2. MERGE TP.....	192
4.2.3.2.1. INC-1	192
4.2.3.2.2. SC-1	193
4.2.3.3. OT grammatical theory.....	194
4.5.4. Methods.....	197
4.5.5. Results and discussion.....	202
4.5.6. Foreign-language exposure	206
4.5.7. A note on TRACE.....	207
4.6. Experiment 5: Phonotactics and syllabification.....	211
4.6.1. Rationale.....	211
4.6.2. Design	212
4.6.3. Predictions	212
4.6.4. Methods.....	213
4.6.5. Results.....	217
4.6.6. Discussion	220
4.7. Experiment 6: Phonotactics of the Japanese lexical strata.....	225
4.7.1. Influence of remote context.....	226
4.7.2. Rationale: The lexical strata of Japanese	226
4.7.3. Experiment 6a: Word-superiority effect	229
4.7.3.1. Design.....	229

4.7.3.2. Methods	230
4.7.3.3. Results and discussion.....	232
4.7.4. Experiment 6b: Lexical stratum phonotactics	233
4.7.4.1. Design.....	233
4.7.4.2. Predictions	235
4.7.4.2.1. TRACE	235
4.7.4.2.2. MERGE TP	236
4.7.4.2.3. OT grammatical theory	236
4.7.4.3. Methods	240
4.7.4.4. Results	241
4.7.4.5. Discussion.....	244
4.8. Summary	245
5. CONCLUSIONS.....	247
