

Analyses of how AI affects Honors were conducted on a data set that included all undergraduate grades given from Fall 1995 through Fall 2006; the dataset used for the results presented in the main report did not include the relevant information.

1. **Honors Program.** These results are based on 1577 students who had completed over 20 classes and were enrolled in the Honors Program during the studied interval (1995-2006).
2. **Major Honors.** These results are based on 7143 students who had completed over 20 classes and were awarded Honors or Highest Honors within a major field of study during the studied interval (1995-2006).
3. **Honors Classes.** These results are based on Honors sections for which there were non-honors sections of the same course in the same department. Comparisons are between 357 Honors sections and 4734 non-honors sections.
