

**Final Exam**

The following table gives statistics for the final exam. Note that the score is the highest score associated with the grade. For example, 25 is the highest F and 26 the lowest D on the final exam.

The next table gives grade thresholds for the course and the distribution of course grades. Thresholds are for total points earned in the course. The maximum possible number of total points is 100. To calculate your final points use the formula:

$$\text{Total Points} = (25/32) * (\text{Mid 1}) + (25/32) * (\text{Mid 2}) + (30/50) * (\text{Final}) + \text{Clicker Points} + \text{Recitation Points}$$
