Dialysis Tubing Preparation

1. Cut tubing into 18-24 inch lengths.

2. Curl into a flask solution of 2% sodium bicarbonate/ 1mM EDTA.

3. Boil for 10 minutes.

4. Rinse 2X with dH2O.

5. Boil for 10 minutes in a solution of 1 mM EDTA.

6. Allow to cool and store at 4°C in a fresh solution of 1mM EDTA in sterile dH2O.

SOLUTIONS

Sodium bicarbonate solution:

1000mls dH2O
20 g sodium bicarbonate
2 mls EDTA
