Phonetics review: Vowel chart

- For the phonetics quiz, be able to describe the circled vowels in terms of **height**, **backness**, **rounding**, and (where needed) **tense/lax**

**VOWELS** -- modified IPA

Where symbols appear in pairs, the one to the right represents a rounded vowel.

- **NOTE:**
  - In handouts for this course, the symbol [a] will **never** be used to represent a front vowel.
